

Auditory Assistance

Whether in a theater, in a house of worship, or at a sporting event, individuals want to experience every word and every moment. That's what they come for, and they deserve to participate by hearing single word. Although most people can suffice with a standard sound system, there are inevitably several in every gathering who could use a little help, or who want an enhanced auditory experience. Listen's products are designed to provide an easy to use and convenient wireless sound solution for your patrons who want to make sure they don't miss a thing.

Listen Technologies Corporation believes in experiencing every sound, whether it's the chosen words of a tour guide or the subtleties of expression emanating from an orchestra's string section. It's all a vital part of the experience, and Listen is dedicated to making sure every individual hears every sound. Listen's exclusive line of state-of-the-art products and technologies are diverse enough for use in auditory assistance, soundfield situations, tour groups and even language interpretation. Plus, our hands-on style and attention to our client's needs allows us to custom fit an auditory system to suit any need and any situation. Let no sound go unheard. Listen.

Why Listen Technologies?

A pleasant listening experience! Listen's products are designed to provide an easy to use and convenient wireless sound solution for your patrons who want to make sure they don't miss a single sound. Each device has it's own volume control making listening pleasant and comfortable for each user.

Customize a system which fits your needs! Each Listen system can be customized to accommodate your requirements, regardless of size. No need to worry about which system to order, let us create one that is just right for your application.

Easy to use! By offering a Listen system for your patrons, you help insure that they get the full experience they came for. Plus with features like a simple LCD readout a battery indicator, the system is not just easy to use, but is often an indispensable part of the service.

Advanced battery technology eliminates hassles... Use the same batteries for years! Rechargeable Nickel Metal Hydride (NiMH) batteries last ten times longer than typical NiCAD batteries. Also, Listen's SmartCharge™ technology lets you recharge the batteries within each unit. This eliminates the need to remove the batteries or a charger at a specified time... the ultimate convenience!

Listen headset receivers are 100% compatible with your existing FM system. When you need to add headset receivers to your present system, choose Listen! In addition to their multi-use capabilities, our receivers can tune into the channel of your existing system. In several instances, you will hear a significant improvement in the audio quality just by using Listen's receivers!

Sample Listen Systems for Auditory Assistance

Basic System

Headset receivers are worn by listeners

Listen's transmitter sends your microphone audio and/or music to the headset receivers

The Basic System's (LS-02-072) receivers can be clipped to a belt, placed in a purse or slipped in a pocket. Individuals can adjust their own volume and sit anywhere.

Call for a quote on a system specific to your needs.

Personal System

Includes a portable transmitter and receiver with a handsome soft sided carrying case

The Personal System (LS-05-072 or LS-05-216) was designed with the individual in mind. The Personal System's LT-700 Portable Transmitter, lapel mic, LR-400 Display Receiver, and Ear Speaker all go in the handy Listen Soft Case to be taken to school, to house of worship, or even the theater. Give the transmitter to the speaker and you won't miss a single sound.
